STOROPACK IS

A SPECIALIST IN PROTECTIVE PACKAGING AND TECHNICAL MOULDED PARTS.

Its product portfolio comprises tailored, flexible protective packaging solutions and their integration into the customers' packaging processes as well as technical moulded parts.

The global group, based in Metzingen, Germany, is divided into two divisions:

MOLDING DIVISION

The Molding division specialises in tailored protective packaging, temperature-controlled packaging and technical moulded parts made of expanded foams for the automotive, pharmaceutical and food industries as well as other industrial sectors.

Insulating properties, shock absorption, durability, and low weight make the materials especially attractive. At its technology centre, Storopack uses state-of-the-art technology – CAD, CNC prototyping, tool design, a drop test facility, and a climate chamber – to create molded parts.

The Molding division is represented by certified production plants in Europe and China.

PACKAGING DIVISION

The Packaging division offers versatile protective packaging solutions with air cushions (AIRplus®), paper packaging (PAPERplus® and PAPERbubble®), PU foam packaging systems (FOAMplus®) and loose-fill packaging materials (PELASPAN® and PELASPAN® BIO).

Its needs-based equipment covers everything from solutions for stand-alone packaging systems to the development and realisation of entire packaging lines integrated into intralogistics and offering manual, semi-automatic or fully automatic packaging systems. Storopack's specialised application engineers see to it that all the processes are fully efficient and ergonomic (Working Comfort®), so as to continuously improve the customers' protective packaging processes.

The Packaging division has representation in Europe, North America, South America, Asia and Australia. Its products are available through retailers in more than 60 countries.

MILESTONES

- 1874 Founded as a tannery in Backnang, Swabia, by Johannes Reichenecker.
- 1920 Johannes' son Hermann takes over at the leather factory and names it Hermann Reichenecker Lederfabrik.
- 1938 The leather factory moves from Backnang to Weinstadt-Beutelsbach.
- 1956 Hans Reichenecker assumes the Hermann Reichenecker Lederfabrik.
- 1959 Storopack Hans Reichenecker GmbH + Co. is founded in Affaltrach near Heilbronn; the company initially specialises in producing moulded parts made of Styropor®.
- 1973 Start of production of loose fill made of Styropor®.
- 1978 Start of business activities in the USA.
- 1982 Merger of Hermann Reichenecker Lederfabrik and Storopack Hans Reichenecker GmbH + Co. In the process, the company discontinues its leather business activities.
- 1987 Loose fill made of renewable resources (Renature®) is added to the product portfolio.
- 1993 Production of the first molded parts made of EPP (expanded polypropylene).
- 1995 Launch of the PAPERplus® product line (paper packaging).
- 1998 Launch of the AIRplus® product line (air cushions).
- 2000 Start of production of packaging moulded parts in China.
- 2001 The name Storopack becomes the corporate brand.
- 2002 Hans Reichenecker hands over operational management of the company to his son Hermann and becomes Chairman of the newly created Supervisory Board.
- 2004 Verena Reichenecker is appointed CEO and runs the company together with her brother Hermann.
- 2005 The Packaging Systems and Packaging Distribution divisions are merged to create the Packaging division. Storopack's vision and guidelines principles are developed.
- 2006 Launch of the FOAMplus® product line (foam packaging).
- 2008 Introduction of PELASPAN® BIO (loose fill) and AIRplus® BIO (air bags), expanding the array of products made using renewable resources.
- 2009 With Working Comfort®, Storopack turns its attention to the ergonomics of packaging and customers' packaging workstations.
- 2012 Storopack begins business activities in Brazil.
- 2013 Storopack establishes a new site in India.
- 2015 Storopack acquires the Japanese company EJ Co., Ltd. (Ebina, Kanagawa Prefecture).
- 2015 Storopack takes control of the Italian retail partner Alternative 1999 s. r. l.
- 2015 Launch of the TCPplus® (temperature-controlled packaging) product line.
- 2016 The long-standing Australian sales partner Intellipack becomes part of Storopack.
- 2019 Launch of the AIRplus® Recycle product range: air cushion films with a recycled content of at least 50%.
- 2019 Development of EPS protective packaging, manufactured from up to 100% recycled EPS and PS.
- 2020 The long-term partner and manufacturer of the machine systems AIRplus® and AIRmove® Ideepak B.V. in the Netherlands becomes part of the Storopack Group.
- 2021 Expansion of the AIRplus® Recycle product range: air cushion films with 100% recycled content.
- 2021 Storopack takes over the majority of shares in cooperation partner OPITZ.
- 2022 With PAPERbubble®, Storopack launches an innovative and sustainable paper alternative to traditional air bubble film.
