

LOOSE Fill[®] by STOROpack

Loose Fill you can count on

- Loose Fill is flexible: it can be used anywhere, anytime, even in automatic filling systems.
- Loose Fill is cost effective: extremely high yield, unlimited storage life and low density for reduced transportation costs.
- Loose Fill protects the environment: it is 100% recyclable, does not contaminate groundwater, suitable for use with food packaging and produced without CFC. Loose Fill made from vegetable starch is water soluble and is 100% biodegradable.

Absolutely customised, absolutely safe

Loose Fill from Storopack:

a sophisticated

system of flowable

cushioning materials

for any requirement.

There are a range of

product specifications to

choose from: Loose Fill made

of EPS (expandable polystyrene) or

vegetable starch. Perfect for any products that call

for cost effective, fast, easy and safe packaging.

Loose Fill from Storopack is the universal, safe and efficient all around cushioning material that protects any product, regardless of its shape. Reliably filling the space and the gaps around the product, Loose Fill provides added protection through its resilience, excellent blocking and bracing properties and high compressive strength. Made from EPS (PELASPAN) or vegetable starch (PELASPAN BIO), Loose Fill is durable and very easy to dispense.

PELASPAN[®] BIO by **STOROPack**

... made from vegetable starch

PELASPAN[®] BIO is produced from only natural raw materials. It is completely compostable and can be disposed of simply in normal domestic waste.

PELASPAN[®] by **STOROPack**

... made from EPS

PELASPAN[®] is extremely resistant to changes in temperature, absolutely water resistant and immune to bacteria and germs.

Loose Fill can be easily integrated into your existing packaging process. Our packaging specialists will be happy to put together a custom made integrated solution to match your particular shipping and packaging situation.
